## ECLOSION

# I DON'T CARE

I don't believe in your words  
I don't give a shit and I'm really bored  
Don't wanna hear you no more  
I'm thinking that I'd rather be alone

So fucking sick of this world  
Nobody is never gonna change my thoughts  
It's time to keep me from you  
I don't wanna be like you

**Chorus:**

Oh no  
Because of your ways  
I don't care if you think all's well  
Outta me, don't give a shit about where  
Back off, back off, back off bitch  
And go ahead, 'cause baby, I don't care

I don't believe in your words  
I don't give a shit about  
The taste of your love  
You're fucking pissing me off  
I'm thinking that I'd rather be drunk

I've been playing your games for so long  
Babe, now I see how this shitty goes  
Lies were what made it improve  
I won't waste more time on you

**Chorus**

Running far away  
From the pieces of ourselves  
Because I've got nothing left lose

Your pride make you insane  
You have thrown it all away  
We have always had a different  
Point of view

Oh no  
Because of your ways  
I don't care if now you repent  
Outta me, don't give a shit about where  
Back off, back off, back off bitch  
And go ahead, 'cause baby, I don't care  
Back off, back off, back off bitch  
I don't care

# STATE OF CHAOS

Babe, do you think that the answers  
They'll give us will break my heart?  
I don't believe what you told me  
Am I dying? Are we dying lord?  
Don't expect a miracle

Empty minds are looking for the way  
To the holocaust, their names are lost  
I can't wait no more for an uncertain  
Salvation while we are getting old  
Condemned, subjugated by the economies  
Interest prevails since our race was born  
Hold on

**Chorus:**

Global state of chaos where we all belong  
I just wanna find the reason  
Why we are waiting for Charon  
There's a coin under my tongue  
Do we not feel this repression?

Should I believe that promises  
Of the government are bona fide?  
No way! Oh no

Milles of years of decadency,  
Autodestruction is fucking getting close  
The technological developments  
Which offer us a paradoxical freedom  
Are dehumanizing the mass  
Revolution will save us

Global state of chaos where we all belong  
I just wanna find the reason  
Why we are waiting for Charon  
There's a coin under my tongue  
Do we not feel this repression?

Our blood can't have been spilt in vain  
Darling, they'll get their deserved  
But how can we stand this control?  
Don't justify the cruelty of this crude world

Global state of chaos where we all belong  
I just wanna find the reason  
Why we are waiting for Charon

There's a coin under my tongue  
Do we not feel this repression?

## SUNRISE

Waiting, waiting for our sunrise meeting  
Hope you don't forget it goes for long  
I wish we'd known it before

Baby, miss you terribly already  
I believe in you, we must go on  
I wanna carry on

Even though it hurts  
Babe, go on

Even though it hurts  
Babe, go on  
Don't stop, don't stop...

Give me another chance to cut out  
All those fears you keep inside  
And let me, let me prove they are not real

Return to your illusions  
Wash the sorrow from off your face  
You should give time to time to  
Relieve the contained pain

**Chorus:**

We'll make our way  
Don't be afraid to change  
You were so ashamed, old friend  
And that's why all turned black again

It's time to improve  
I know you are strong  
Enough to live  
Keeping control

Wipe away your tears and don't you cry  
The flame has just turned blue  
So make it last  
Open your eyes to seize your life today  
Make sure you throw it all away

We'll make our way  
Don't be afraid to change  
You were so ashamed, old friend  
And that's why all turned black again  
It's time to improve  
I know you are strong  
Enough to live  
Keeping control

Waiting, waiting for our final meeting  
Hope you don't forget it's been so long  
Have you get it done?  
Baby, war can stop so keep on dreaming  
I had never wanted to be alone  
But I should carry on  
Even though it hurts

## COLD HELL

I'm a million miles from the life I left behind  
Was it real? What do you feel?  
Many faults  
So many reasons why all was wrong  
I couldn't fly without getting high

A new start's come  
Time to leave and feel alive  
So don't you come or I will fly

**Chorus:**

Wanna rise above the storm  
And escape the waves  
Of this drowner ocean  
That has brought me to my knees  
Now it's too late, I won't come back soon  
Damn! It's all because of you  
Because of you

All my bleeding wounds begin to scar  
As I walk far away from you  
I swear it's true  
Many doubts until you showed me  
All I needed to know  
And this is why I didn't say goodbye

Your chance has gone  
So let it die  
And forget those shadows  
That won't come back  
A new start's come  
I just wanna feel alive  
So don't you come or I will fly

Wanna rise above the storm  
And escape the waves  
Of this drowner ocean  
That has brought me to my knees  
Now it's too late, I won't come back soon  
This time I will not get on cue

Nor I'll lose my damn way again  
We'll see each other in a cold hell  
I won't lose my way again  
We'll see each other in hell

Listen, I have heard this all before  
I always knew it was built to fall  
But I can't let the water drag me down  
Tidal waves won't keep me safe and sound

Wanna rise above the storm  
And escape the waves  
Of this drowner ocean  
That has brought me to my knees  
Now it's too late, I won't come back soon  
Damn! It's all because of you  
Once again you'll realize my word is good

Chorus

## BROKEN PUZZLES

Foreign paradise  
From the land nobody knows  
Oh my god! That should be wrong  
Broken puzzles around my head  
The sky is turning grey!

It would be so painful to see  
The story begin  
Wait! And please don't hold your breath  
Broken puzzles around your head  
The rain is back again

Lies!

Chorus:

Drifting in and out, there's much to say  
The miracles we believed in  
Fall into evidence

Drifting in and out of ourselves  
Blue miracles

Back and forth like the flashes  
Of a close storm  
Beloved but feared by their souls  
Broken puzzles around their heads  
The Eden is fading out

Coming back from the kingdom of heaven  
Where we belong  
Lies! Our faith is no more  
Broken puzzles around our heads  
Please let me talk to your God

Drifting in and out, there's much to say  
The miracles we believed in  
Fall into evidence

Drifting in and out of ourselves  
Blue miracles

Broken puzzles around my head  
Undercover frauds with a nice smell  
Shouldn't believe in that refrain  
The promises are getting far and away

Broken puzzles around your head  
Along the divine lawn you'll search them  
All the sins we shouldn't learn  
Are growing up  
You know you can't avoid them

Drifting in and out, there's much to say  
The miracles we believed in  
Fall into evidence

Drifting in and out of ourselves  
Blue miracles

Drifting in and out, there's much to say  
Blue miracles

I know you are strong  
Enough to live  
Keeping control

Give me another chance to cut out  
All those fears you keep inside  
And let me, let me prove they are not real

Because old disillusion  
Were due to the shames of yesterday  
And may this lesson learned  
Ohh be your best

We'll make our way  
Don't be afraid to change  
You were so ashamed, old friend  
And that's why all turned black again  
It's time to improve  
I know you are strong  
Enough to live  
Keeping control
